What is Cisco Webex?

Team collaboration apps such as Cisco Webex, Microsoft Teams and Slack have captured the attention of knowledge workers at companies large and small, across industries, and with no geographic limitations. If you are not talking to your customers about collaboration, then someone else will be.

Webex Features

The key to Webex is to deliver a core application that is key to the customer communications and working environment.

- Chat and presence provide collaboration in a single view, no jumping between windows for chats or team messages
- Space meetings for all users – Schedule meetings from the space
- Office Integration with outlook scheduling
- Webrtc for external users (no app to install)
- Control Hub admin access for IT to manage Webex environment
- Much more – Learn more about 10x your meeting experience https://www.webex.com/productannouncements.html

What do I get with Webex?

- Threaded Messaging and Presence
- Persistent Workspaces
- Fully featured Softphone
- Multi-Point Video
- Full Webex ecosystem

Benefit from Webex Collaboration

With Webex, your calling, meetings and collaboration are all in one place, regardless of users being internal or external to your organisation. Backed by the end to end SLA of a carrier grade provider.

Integration

Webex from Evolve IP isn't an add-on, it's a fully integrated solution. Bringing the features and functionality of the Industry Leading Broadsoft cloud calling platform and integrating with the 10x collaboration of Webex. End to End Carrier grade telephony with full SLAs is designed to provide calling and collaboration you can rely on.

Cisco Won UC Today's Best Collaboration Platform for 2020.

Play Nicely With Microsoft

Webex from Evolve IP plays nicely with all your existing Microsoft tools. Easily connecting to your calendar and Outlook for meeting scheduling, adding sharepoint libraries for simple collaboration and document editing. Webex even provides a plugin from Microsoft Teams, you can then place calls from within Microsoft Teams but using your Webex client and not requiring the phone system license from Microsoft.

Meeting and Collaboration

Core to any collaboration experience is the persistence workspace. The space is created to seamlessly group together a team, both with internal and external parties. Enabling 3rd party collaboration tools, provides native editing and creation of Microsoft documentation.

Space meetings are designed for meetings about that 'Space'. They don't have external dial in numbers and everyone must be a member of the space, internal or external. PMR is your personal meeting room. You can invite anyone into the room and the room has external PSTN dial in numbers, upgrade that room to premium to add advanced features like recording and upto 1000 participants.

Evolve IP

Evolve IP is designed to advance today's hybrid workplace. We partner with the world's biggest tech companies and innovative industry leaders to create robust and reliable solutions for our resellers.

We are a global collaboration provider that specialises in bringing together unified communications, collaboration tools, contact centre, voice, and omni-channel solutions securely into the cloud. As a vendor, we integrate these disparate systems to create a bespoke solution for your customers using systems from leaders like Microsoft, Cisco, Dubber, and more. Choose Evolve IP's carrier-grade voice solution, built with the user in mind, to help make the future of work better for everyone.
