

# Experience the power, speed & style

The new ZyXEL 802.11ac Access Point –  
get your wireless network moving  
in style.

## Wireless network speeds are topping the gigabit mark, so why are users still waiting?

The NWA1123-AC delivers link speeds of over 1Gbps with unparalleled coverage and throughput. Eliminating slow and dead spots, and ensuring a matchless user experience. But it doesn't have to be that way.

The new ZyXEL Smoke Detector Style AC Access Point is designed with modern networking in mind. Our unique, revolutionary Smoke Detector design not only looks great, fitting seamlessly with ceiling decor, but also delivers link speeds of over 1Gbps with unparalleled coverage and throughput, eliminating slow spots and dead spots, and ensuring a matchless user experience.

**Eliminate waiting, for good. Bring your network up to speed today with the Smoke detector Style AC Access Point.**

## 10 reasons to buy

- 01 Unparalleled user experience
- 02 Maximum throughput
- 03 Eliminate dead spots and slow spots
- 04 Hidden in plain sight
- 05 Legacy 2.4Ghz & 5Ghz Wireless Support
- 06 One seriously flexible device
- 07 Trouble-free installation and management
- 08 Instant, secure access for guests
- 09 Power over Ethernet support
- 10 Unbeatable performance with unbeatable value

# 10 reasons to buy

- 01 Unparalleled user experience** – 802.11ac 2x2 Smart MIMO antennae allow link speeds of over 1Gbps, which means no more waiting for network applications to respond.
- 02 Maximum throughput** – Utilization of the less crowded 5GHz range lets your network support more users and more concurrent videos streams.
- 03 Eliminate dead spots and slow spots** – Uniquely optimized concurrent 2.4GHz and 5GHz radios overcome the coverage limitations suffered by competing 802.11 WiFi products, meaning simpler deployment, fewer access points and no network dead spots.
- 04 Hidden in plain sight** – Our unobtrusive Smoke Detector style, plenum-rated design fits seamlessly with your ceiling décor for a safe, simple and inconspicuous installation.
- 05 Legacy 2.4GHz Wireless Support** – Ensure your new tables and laptops connect at top speed, while still supporting your older hardware
- 06 One seriously flexible device** – A wireless repeater to extend your network, an Access Point to connect wireless users or a Network Servicer to connect printers, fax machines and other wired devices, all in one simple, cost-effective solution.
- 07 Trouble-free installation and management** – Simple web or telnet configuration to get your network up and running in record time
- 08 Instant, secure access for guests** – Our AP provides clients with protection from other connected devices, giving instant, secure network access at truly impressive speeds.
- 09 Power over Ethernet support** – PoE ensures a simple, economical and elegant installation using only network data cables – no need for an electrician.
- 10 Unbeatable performance with unbeatable value** – Maximise the performance of your wireless network with robust, reliable enterprise-class technology at a very reasonable price.

## ZyXEL standalone AP range

Standalone Access-Points from ZyXEL are ideal for smaller office Wireless up to 20 users. Use them where you need them – easy as 1, 2, 3.

Wireless	802.11n	802.11n	802.11n	802.11ac
